VARJE KASS

Software Developer

ABOUT ME

I started studying programming in 2015 and have been working as a developer since 2017. Programming world is fascinating for me as it is in constant change.

In my free time, I enjoy dancing, board games, DIY projects and doing volunteer work – either connected to Estonian folklore, mentally challenged people, or animals.

I am open to new projects and work offers. Work location should preferably be in Tartu, Estonia or remote. For me work is not only salary, but I would like to find something that I really believe in and love to develop.

I speak Estonian and English fluently and a bit of French and Russian.
